FOR IMMEDIATE RELEASE

Mstar Partners with Center 7 for Comprehensive Network and Bandwidth Management

Utah's top triple play provider expands technical capabilities with local IT infrastructure provider

LINDON and OREM, Utah – September 17, 2007 – Center 7, Inc., a leading provider of hosted business solutions, and Mstar, Utah's largest and fastest-growing fiber-optic service provider, today announced that Mstar has chosen Center 7 to provide network management and bandwidth for its 10,000 plus current customer base.

"We are very excited to work with Center 7 to increase our network capacity and to deliver even more unique services to our customers," said Ben Gould, President and CEO of Mstar. "With Center 7's new management team, technology expertise, and the finest hosting facility in the country, we confidently chose Center 7 to help us further improve the quality of services we provide to our customer base. This relationship is key to our plan to provide the premier converged IP experience in the country."

The partnership brings more advanced networking services and capacity to Mstar's customers. Included in this unique agreement, Center 7 will provide Mstar with a fully redundant network including points-of-presence in Salt Lake City, Provo and Lindon. This architecture provides a fail-over system including traffic shaping, the highest quality bandwidth available, and rapid provisioning capabilities. By leveraging Center 7's expertise combined with the technologies they bring, Mstar can further improve and expand the services offered, deliver a higher quality experience for its customers, and reduce operating and bandwidth expenses.

"Opportunities to work with providers like Mstar are at the core of our strategy," said Nathan Hatch, President and CEO of Center 7, Inc. "This partnership provides the world's best fiber-optic IPTV provider with the capacity to grow and expand without the worry about increasing costs and network capability."
