Murray-based MSTAR Becomes Newest UTOPIA Service Provider

Triple play provider to expand service offering to cities across the state of Utah

MURRAY, Utah – February 9, 2005 – MSTAR, Utah’s largest and fastest-growing fiber-optic service provider, today announced it will be providing services on the Utah Telecommunication Open Infrastructure Agency (UTOPIA) network to cities up and down the Wasatch front.

“This is a huge step in the right direction and we are happy to be affiliated with such a cutting-edge network,” said Jon Hansen, president and chief executive officer of MSTAR. “People are going to be blown away by the quality of the services we offer over the UTOPIA fiber connection.”

MSTAR already offers industry-leading “triple play” services to customers on the iProvo network. The Internet, phone and television products offered over the fiber-optic network are at the forefront of technology in the telecommunications market.

“We are happy to have MSTAR on board and we’re confident that they will be a fantastic partner with us as we serve customers,” said Paul Morris, executive director of the UTOPIA network.

UTOPIA owns the fiber infrastructure and leases out the bandwidth to private companies like MSTAR who in turn offers retail telecommunications services to residences and businesses. MSTAR’s triple play offering includes Internet, phone and television products offered over the fiber-optic network.

“MSTAR is a real up-and-coming company in the industry and we are excited about the boost this will provide to the network across the state,” said Keith Wilson chief executive officer at Dynamic City. “We know that the fiber-optic based service products are leaps and bounds better than what people have had before.”

About MSTAR

MSTAR is Utah’s premier provider of ultra high-speed Internet, telephone, television and related communications services across a world-class fiber optic network. Launched in 1998 as Deseret Online, MSTAR began as a provider of value-added IP-based services and has now become the state’s largest and fastest-growing fiber-optic service provider. MSTAR is also Utah’s first and the nation’s second largest licensed Internet Protocol Television (IPTV) provider.
